

MANUFACTURER REFERENCE DRAWING

NOT FOR CONSTRUCTION

Manufacturer Reference Drawing Disclaimer

This drawing and the information contained herein are provided by the manufacturer for preliminary reference, coordination, and conceptual illustration purposes only. The details shown represent typical configurations of the manufacturer's product and are not intended to represent a complete or final design.

This document does not constitute a structural, architectural, civil, or engineered design and shall not be used for permitting, bidding, fabrication, or construction without review and written approval by the licensed Engineer and/or Architect of Record for the project.

All project-specific design requirements including, but not limited to:

- Structural design and load calculations
 - Foundation and footing design
 - Soil conditions and geotechnical considerations
 - Site grading and drainage
 - Wind, seismic, snow, and live load compliance
 - Building code compliance
- Local jurisdiction requirements shall be determined and verified by the Engineer/Architect of Record.

The manufacturer makes no representation or warranty that the configurations shown are suitable for any specific site, project, or application. Dimensions, elevations, clearances, and structural components must be verified by the responsible design professional.

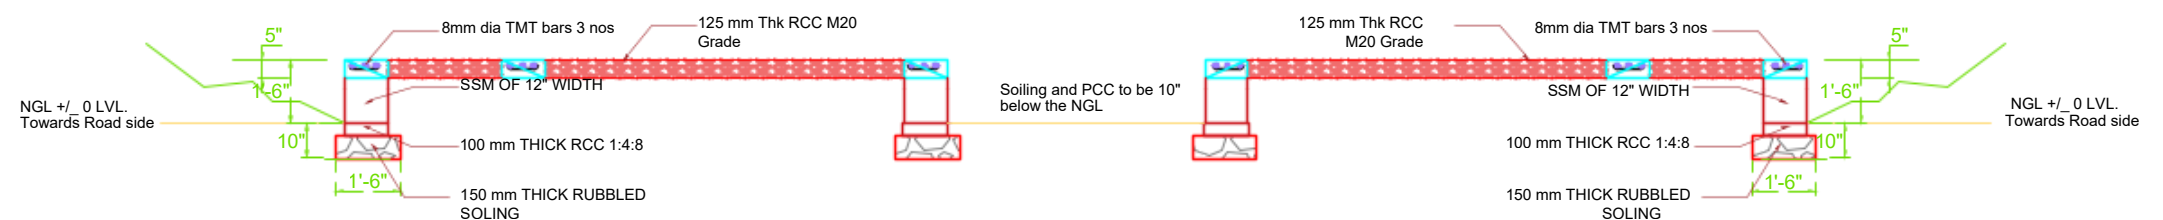

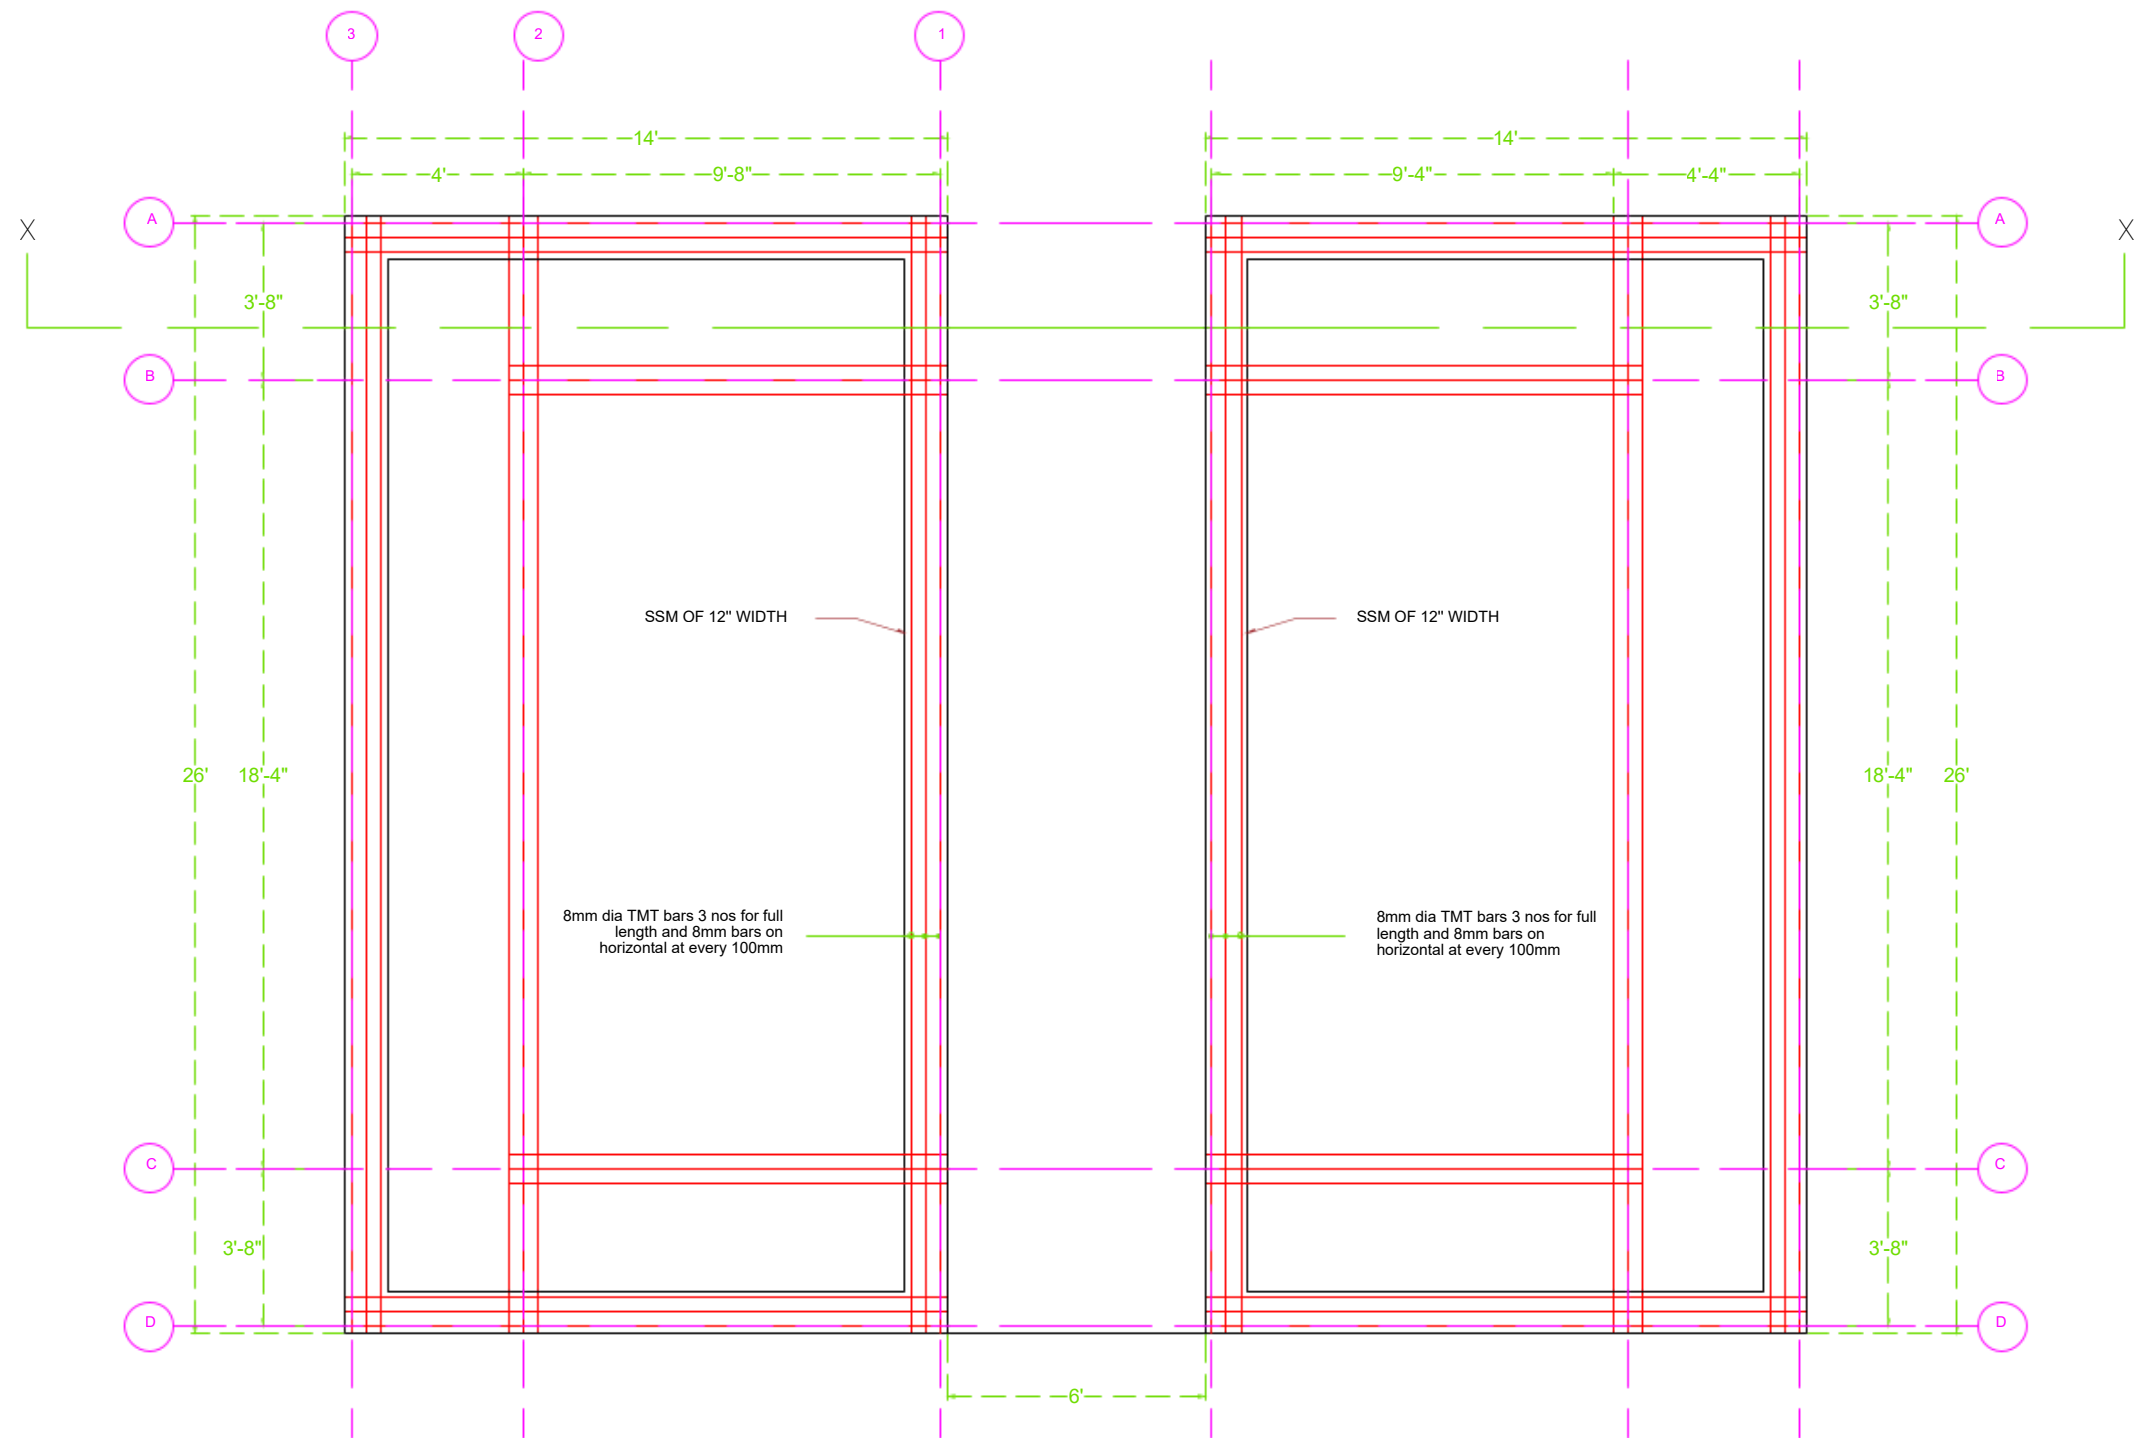

The manufacturer assumes no responsibility or liability for:

- Structural adequacy of the design
- Site conditions or soil capacity
- Compliance with applicable codes or regulations
- Modifications made by others
- Installation methods or construction practices

Use of this drawing without review and approval by a licensed design professional is at the sole risk of the user.

Do not scale drawings. Verify all dimensions and site conditions prior to construction.

Project-specific engineering, shop drawings, and stamped calculations may be required prior to fabrication or installation.
